# **About Us**

# Enduring structures made possible by CLADO

CLADO produces its products in line with global standards, prioritizing an eco-friendly approach born from rigorous research and development efforts. Such innovation is a product of the advanced technology nurtured by the skilled team at CLADO's state-of-the-art production hubs. The in-house labs constantly adapt to the evolving facade needs, ensuring their existing products consistently meet the high bar they've set.

With a seasoned team at its helm, CLADO continually devises novel solutions, tailored both to the shifting global market dynamics and the specific requirements of individual projects. Throughout this process, there's no compromising on quality, as regular tests are conducted within their labs.

Each item crafted at the CLADO facilities is tailored to the unique climate conditions of its destination country. Rigorous lab testing ensures that the longevity of CLADO's products matches the durability of the buildings they adorn.

# **An Elevated Advantage**

# Over Conventional External Thermal Insulation.

## Rapid Installation

Offers a quicker setup than conventional thermal insulation methods such as plaster and mesh application.

# **Neat & Tidy**

Compared to traditional methods, CLADO's solution is notably cleaner. This stands out, especially in renovation projects, where there's no risk of dirtying shutters or air-conditioning systems with plaster.

### **Economical Labor**

The labour cost for CLADO's system is notably lower than its traditional counterparts.

# **Superior Insulation**

CLADO's Decorative Insulation System is crafted from EPS with a density of 24–30 kg/m3, ensuring enhanced insulation compared to the 16kg/m3 EPS density found in typical external insulations.

### Seamless Finish

Materials treated under controlled factory conditions deliver a smoother finish, eliminating the common plastering and trowel marks that become evident under side sunlight with conventional methods.

# **Artistic Versatility**

The panels can be tailored into diverse designs, enabling boundless architectural creativity. The external CLADO facade can mimic textures like Wood, Terra Cotta, Ceramic, or Facing Brick.

# **Flawless Application**

Our user-friendly prefab products drastically reduce the chances of labor-related errors.

# **Exterior Moldings** and Accents

Crafted using the distinctive mesh-free EPS/Styrofoam Coating Technology, CLADO caters to the commercial, residential, and entertainment sectors. CLADO's architectural elements are meticulously designed to elevate building exteriors, ensuring longevity in every piece. By choosing CLADO's products, you bypass issues commonly found in conventional cementitious or other synthetic renders, such as surface cracking, detachment, and colour fade. Our products not only offer durability but also present unmatched versatility, accommodating even the most intricate designs, be it flat or contoured, concave or convex. The finish can replicate a stony texture, pristine white, and when painted, radiates vivid colours.

- Adaptable exterior finish
- Robust and durable
- High resistance to impacts and mechanical forces
- Long-lasting, even in extreme weather conditions
- Minimal water uptake
- Exceptional tolerance to temperature and moisture fluctuations
- Superior bonding capacity
- Optimal CO2 and water vapour permeability, promoting faster moisture transfer and evaporation for walls that breathe
- Quick and straightforward installation of architectural designs
- Direct application of primer and paint topcoat
- Excellent compatibility with exterior construction paints
- The pure white coating facilitates the application of bright, vivid shades
- Ideal for a vast array of architectural forms.

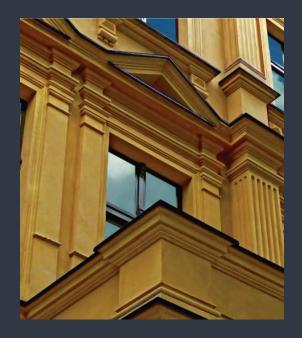

**Interior Moldings** and Accents

Crafted with advanced cut and injected XPS Technology. CLADO is at the forefront of innovation, integrating cutting-edge technology, materials, and design. The outcome is a holistic collection crafted by and for discerning professionals: encompassing moldings, trims, skirtings, and lighting profiles. Products are either derived from precision hot-cut XPS blocks or are intricately injected to form complex shapes. This ensures a swift and cost-effective solution for embellishing any interior environment.

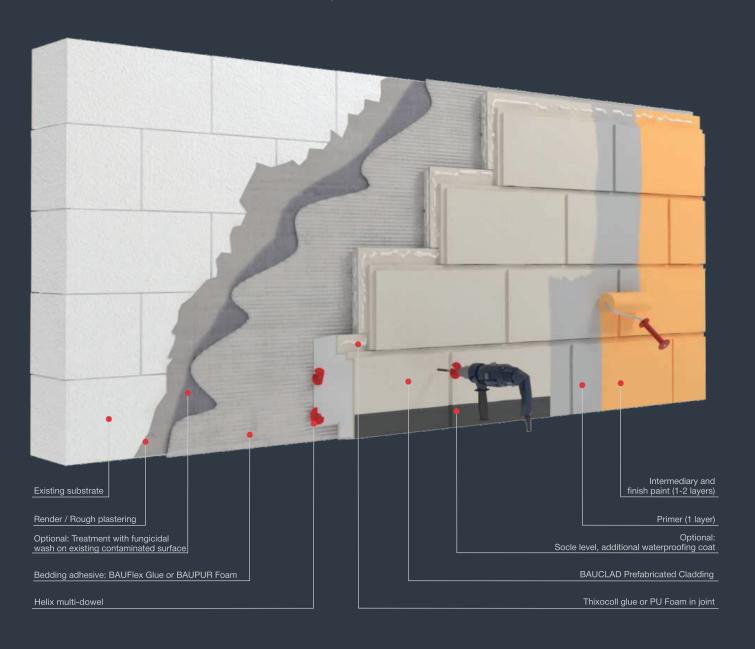

# **Exterior Prefabricated Design**Wall Cladding

Perfect for new buildings, Renovations and Thermal insulating projects

The system is recommended for new constructions and renovations where facade aesthetics with highquality thermal insulation at an acceptable price is a target. The BAUCLAD product range is intended for external decorative thermal insulation and finishing of wall constructions with the highest demands on insulation effciency. The increased thermal resistance leads to an immediate significant reduction in costs and the investment return on thermal insulation is fast.

Ideal usage for low-energy and passive houses and everywhere where is need to achieve maximal thermal insulation, best aesthetics and fastest installation time.
